Step by Step Guide to launching Choices Not Chances Program:

1. Download Choices Not Chances zip folder from Dropbox.
2. Open downloaded folder
3. Copy folder onto desktop
4. Open Choices Not Chances folder from desktop
5. Open Decision Tree folder
6. Double click the **index.html** file
7. Choices Not Chances program will launch

The decision tree simulation exams three scenarios: gangs, dating violence, and bullying. Two versions of the decision tree are available: Word documents to be used by the presenter and html versions that can be used in an individual or group setting. Javascript needs to be allowed in order to view the html presentation properly, and it's also recommended to view it in full screen (PC users press F11 on your keyboard; Mac users press Command-Shift-F on your keyboard).

Troubleshoot Tips:

If you are using a Mac, you may need to download Flip4Mac, a free extension that allows QuickTime to play wmv files. You will be automatically prompted by the software if that is the case.
